WORK EXPERIENCE

IFCA MSC BHD

Software Engineer

August 2025 – Current

Petaling Jaya, Selangor

- Developed and maintained **AccountX (financial accounting system)** using **React, Node.js, PostgreSQL**, and **GraphQL**, delivering client requirements across multiple environments
- Managed **production support, feature enhancements, and Linux-based deployments** using **Git** workflows to ensure system stability and reliable releases
- Built a **Patch Notes Generator (Vite, Node.js)** integrated with **DevOps APIs** to fetch PR commits, summarize changes, and generate formatted release notes
- Implemented a **Password Policy feature** with configurable rules by account type (uppercase, lowercase, special characters, password reuse prevention) to enhance security compliance

Aspen Spectra Sdn Bhd

Software Engineer

July 2024 – August 2025

Mid Valley City, Kuala Lumpur

- Designed and prototyped **desktop/mobile UI in Figma**, validating user flows and functionality with stakeholders
- Built **React (Vite) frontend using shadcn/ui and Tailwind CSS**, integrating backend APIs to deliver production-ready interfaces

EDUCATION

Carleton University

Bachelor of Computer Science (BCS), Major in Computer Science

June 2023

Ontario, Canada

SKILLS

Programming Languages: JavaScript / TypeScript, Java

Frameworks & Technologies: React.js, Node.js, Spring Boot, GraphQL, Docker, SQL (PostgreSQL), and NoSQL (MongoDB)

Tools: Figma (UI design), Postman (API testing and debugging), GitHub (source code management), Swagger/OpenAPI (documentation)

SIDE PROJECTS

ServiceCycle | Vehicle Maintenance API | <https://servicecyclebe.onrender.com/swagger-ui/index.html>

- Built a **REST API** with a relational schema using **Spring Boot** and **Supabase** for PostgreSQL and OAuth2/JWT authentication, implementing MVC/DTO architecture, access control, and parts lifecycle and mileage tracking, deployed via **Docker** with **Swagger** documentation

Strada | Automotive Showcase Website | <https://stradamotors.vercel.app>

- Designed a single-page application using **React, TypeScript, Next.js**, and **Tailwind CSS** to showcase animation, responsive design, and deployment skills through an interactive automotive gallery

Art Gallery | Art Discovery & Download Platform | <https://the-agora.vercel.app>

- Built with **Next.js, React, TypeScript**, and **Tailwind CSS**, using **Axios** to fetch real-time artwork data, images, and metadata from the Art Institute of Chicago API, with **TanStack Query** for caching and state management, and file-saver enabling direct downloads
